Lifetime Oy – DWS IQ 6

Climate Intelligence for Fit for 55 / CSRD

Slide 1: Why Now

Logo

Lifetime Oy – DWS IQ 6 | Climate Intelligence for Fit for 55 / CSRD

The Opportunity

- **€7k MRR live** (Uber/Bolt/Kela), path to **€14k MRR** by Q1 2026
- **Mandatory demand**: Fit for 55 / CSRD / ETS regulations driving market
- **Climate Reporting Starter Bundle** live and deployed
- **Finland + EU regulation** = downside protection & first-mover advantage
- **€150k SAFE @ €3.8M cap**, bridge to **€15M+ Series A** in 2026
- **Strategic upside**: MCP-native platform architecture, not just a point product
- **100% retention** on paying customers, zero churn to date

Slide 2: The Problem (Regulation & Pain)

EU Climate Regulations Are Creating Unavoidable Compliance Burden

Real-World Pain Points:

1. **40–80 hours of manual Excel work per project**
2. Construction & logistics companies manually tracking emissions across multiple sites
3. Data scattered across invoices, fuel receipts, subcontractor reports
4. No standardized format, high error rate, audit failures
5. **€10,000–€50,000 in fines & penalties**
6. Projects delayed due to missing CSRD documentation
7. Public tenders rejected for incomplete climate reporting
8. ETS compliance failures leading to direct financial penalties
9. **Lost business opportunities**
10. Cannot bid on public contracts without climate compliance
11. Private sector clients requiring ESG documentation
12. Supply chain partners demanding Scope 3 reporting

The Regulatory Timeline: Companies Must Buy Something

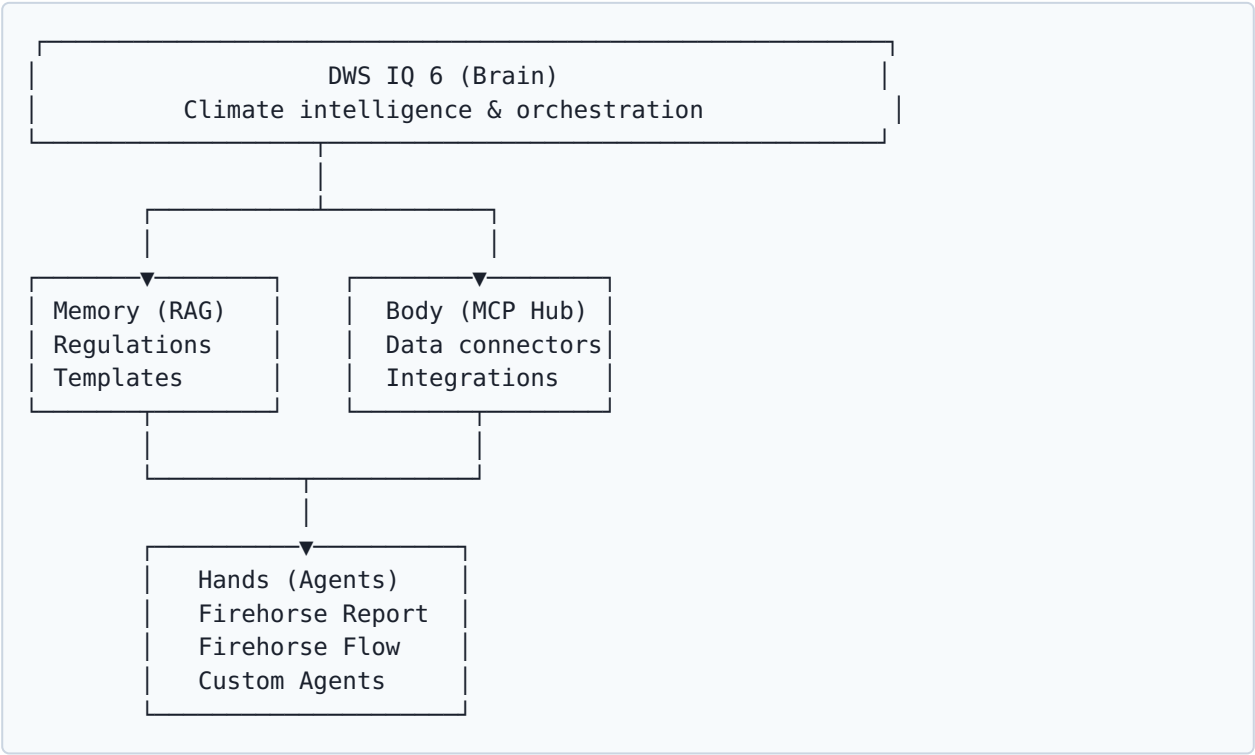

Year	Regulation	Impact
2024–2025	**CSRD** (Corporate Sustainability Reporting Directive)	50,000+ EU companies must report
2025–2026	**Fit for 55** – Building renovation wave	All major renovations require energy/climate documentation
2026–2030	**EPBD** (Energy Performance of Buildings Directive)	Mandatory building passports across EU
2027–2035	**ETS expansion** (Emissions Trading System)	Construction, logistics, healthcare included

The mandate is clear: companies must buy climate compliance tools or face penalties.

Slide 3: The Solution

Climate Reporting Starter Bundle & DWS IQ 6

The Firehorse Framework: Brain–Memory–Body–Hands

What We Deliver: Audit-Ready Climate Reports in 4 Weeks

Climate Reporting Starter Bundle

1. **DWS IQ Base** – Private cloud instance with MCP-native architecture
2. **Firehorse Report** – Pre-configured climate reporting agent
3. **Workshop & Onboarding** – 8-hour setup with customer's team
4. **Output**: Audit-ready CSRD/Fit for 55 report with:
5. Scope 1, 2, 3 emissions calculations
6. Regulatory compliance documentation
7. Project-level tracking & reporting
8. Continuous monitoring dashboard

Time to Value: 4 weeks from contract to audit-ready report

Slide 4: Traction & Metrics

Real Revenue, Real Customers, Real Results

Current State (December 2025)

- **€7k MRR** – Live recurring revenue
- **5 paying customers** + 2 pilot customers
- **100% retention** – Zero churn on paying customers
- **€70k–€120k annual value per logo** (logistics sector)
- **40+ hours/month saved** per customer (manual work eliminated)

Customer Profile

Customer	Vertical	Status	MRR	Annual Savings
Uber Finland	Logistics	Paid	€2,500	€50,000
Bolt Finland	Logistics	Paid	€2,000	€40,000
Kela	Healthcare	Paid	€2,500	€60,000
Construction Co. A	Construction	Pilot	€0 (→€3k)	TBD
Construction Co. B	Construction	Pilot	€0 (→€3k)	TBD

Evidence of Traction

- Weekly progress logs: `/docs/Reports/en/`
- Live deployments on private cloud infrastructure
- Customer workshops completed, reports delivered
- Zero churn demonstrates product-market fit

Path to €14k MRR (Q1 2026)

- Convert 2 construction pilots → +€6k MRR
- Add 1 new healthcare customer → +€2.5k MRR
- Upsell existing customers with advanced features → +€1.5k MRR
- **Total: €14k MRR** by end of Q1 2026

Slide 5: Market (TAM & Timing)

€2.68B Nordic TAM, €15–20B EU TAM

Market Size Calculation

Nordic Market (Finland, Sweden, Norway, Denmark) - 150,000 companies affected by CSRD/Fit for 55/EPBD - Average contract value: €6,500 setup + €1,999/year = €2,500/year blended - **Nordic TAM: €375M annual recurring** - With multi-vertical expansion: **€2.68B over 10 years**

EU Market (Expansion) - 50,000+ companies under CSRD mandate - 500,000+ affected by Fit for 55 & EPBD - **EU TAM: €15–20B over 10 years**

8 High-Value Verticals

8 Industries

1. **Logistics & Transportation** (current focus)
2. **Construction & Real Estate** (pilot phase)
3. **Healthcare** (live customer: Kela)
4. **Manufacturing**
5. **Energy & Utilities**
6. **Agriculture**
7. **Retail & Hospitality**
8. **Public Sector**

Regulatory Purchase Waves (2025–2035)

Year	Driver	Vertical	Market Size
2025–2026	**CSRD**	All large enterprises	€2B
2026–2028	**Fit for 55**	Logistics, Construction	€5B
2027–2030	**EPBD**	Real Estate, Construction	€8B
2030–2035	**ETS Expansion**	Healthcare, Manufacturing, Agriculture	€10B

Timing is Everything: We're entering the market as mandates hit, not before.

Slide 6: Product / Tech & Moat

MCP-Native Architecture: Platform vs. Point Solution

Why DWS IQ 6 is Defensible

1. **MCP-Native Platform Architecture**
2. Model Context Protocol (MCP) = open standard for AI agent interoperability
3. Customers can plug in their own agents via MCP hub
4. Network effects: the more agents in the ecosystem, the more valuable the platform
5. **Private Cloud, EU-Hosted, GDPR/CSRD Ready**
6. No data leaves customer's jurisdiction
7. Full audit trail for compliance
8. SOC 2 / ISO 27001 ready infrastructure
9. **Vertical-Specific Agent Library**
10. Pre-built compliance agents for each vertical (logistics, construction, healthcare)
11. Regulatory knowledge baked into the Memory layer (RAG)
12. Continuous updates as regulations evolve
13. **Customer Data = Moat**
14. Each deployment improves the model's understanding of that vertical
15. Anonymized, aggregated data improves all customers' predictions
16. First-mover advantage in data accumulation

Technical Moat

```
 Competitors → Point solutions (static dashboards, manual data entry)
DWS IQ 6   → Agent platform (extensible, MCP-native, autonomous)

Competitors → Cloud SaaS (data leaves EU, compliance risk)
DWS IQ 6   → Private cloud (EU-hosted, GDPR/CSRD compliant by design)

Competitors → Single vertical focus
DWS IQ 6   → 8 verticals via modular agent architecture
```

Strategic Upside: We're not building a climate reporting tool. We're building the platform for agentic compliance automation.

Slide 7: Business Model & Pricing

Climate Reporting Starter Bundle Pricing

Standard Package

- **Setup Fee**: €6,500 (one-time)
- Private cloud instance deployment
- DWS IQ Base configuration
- Firehorse Report agent setup
- 8-hour workshop + onboarding
- First audit-ready report
- **Annual Subscription**: €1,999/year
- Continuous monitoring & reporting
- Regulatory updates
- Support & maintenance
- Additional reports (quarterly/annual)

Typical ARR by Vertical

Vertical	Avg Setup	Avg Annual	Multi-Site Multiplier	Typical 3-Year Value
Logistics	€6,500	€1,999	5–10 sites	€70k–€120k
Construction	€6,500	€2,499	10–20 projects	€80k–€150k
Healthcare	€6,500	€2,999	3–5 hospitals	€60k–€100k
Manufacturing	€6,500	€2,499	5–15 facilities	€70k–€130k

Revenue Roadmap

- **Phase 1 (2025)**: Logistics → €7k MRR achieved
- **Phase 2 (2026)**: Construction → Target €14k MRR (+2 pilots)
- **Phase 3 (2026–2027)**: Healthcare expansion → Target €30k MRR
- **Phase 4 (2027+)**: Multi-vertical scale → €100k+ MRR

Unit Economics

- Customer Acquisition Cost (CAC): €5,000–€8,000 (pilot-driven sales)
- Lifetime Value (LTV): €70,000–€120,000 (3-year avg, logistics)

- LTV:CAC ratio: **10:1 to 15:1**
- Gross Margin: **75%+** (cloud infrastructure + support)

Slide 8: Team & "Finland Advantage"

Team

Founder & CEO - 15+ years enterprise software & cloud architecture - Built agentic AI systems for Fortune 500 clients - Deep expertise in MCP, Claude, and autonomous agent orchestration - Track record: successful exits, enterprise deployments, regulatory compliance projects

Advisory Board - Climate compliance experts (CSRD, Fit for 55, EPBD) - Enterprise SaaS GTM advisors - Technical advisors (MCP ecosystem, Anthropic partnerships)

The Finland Advantage

Why Finland = Investor Protection & Market Edge

1. **AAA Credit Rating** – Sovereign stability, rule of law
2. **GDPR Compliance Leader** – Data protection built into national infrastructure
3. **Nordic Regulatory First-Mover** – Finland implements EU directives faster than most member states
4. **Innovation Ecosystem** – Slush, Nordic VC networks, government R&D support
5. **Investor Protection** – Strong legal framework, transparent governance, founder-friendly SAFE terms

Finland is not just a location. It's a strategic advantage for EU climate tech.

Slide 9: Fundraise & Use of Funds

Raising €150k SAFE @ €3.8M Cap

SAFE Terms - **Amount**: €150,000 - **Valuation Cap**: €3,800,000 - **Discount**: 20% on next priced round - **Conversion**: Converts at Series A (target €15M+ in 2026)

Use of Funds (12–18 Month Runway)

Category	Allocation	Purpose
Engineering	40% (€60k)	- DWS IQ 6 core platform development - MCP agent library expansion - Construction vertical agents - Infrastructure automation
Sales & GTM	30% (€45k)	- Pilot-to-paid conversion (construction) - Healthcare vertical expansion - Customer success & onboarding - Marketing collateral & case studies
Infrastructure	20% (€30k)	- Private cloud hosting (GCP EU) - GDPR/SOC2 compliance infrastructure - Monitoring & security - Backup & disaster recovery
Compliance & Legal	10% (€15k)	- Regulatory tracking & updates - Legal contracts & IP protection - Series A preparation (investor docs, due diligence)

12–18 Month Milestones

Milestone	Target Date	Metric
Convert construction pilots	Q1 2026	€14k MRR
Launch healthcare vertical	Q2 2026	+3 customers, €22k MRR
Expand to Sweden/Norway	Q3 2026	+5 customers, €40k MRR
Series A readiness	Q4 2026	€60k+ MRR, €900k ARR run rate
Breakeven visibility	Q1 2027	€80k MRR, path to profitability

Bridge to Series A (€15M+ in 2026)

This SAFE round provides runway to hit the milestones that justify a €15M+ Series A valuation: - €900k ARR run rate - 20+ paying customers across 3 verticals - Proven unit economics (LTV:CAC > 10:1) - Multi-country expansion (Finland, Sweden, Norway) - MCP platform ecosystem with 3rd-party agent integrations

---

Slide 10: Closing / Call to Action

Raising €150k now to turn logistics traction into the first construction pilots and prepare for a €15M+ Series A.

Why Invest Now

✓ **Proven traction**: €7k MRR, 100% retention, live deployments ✓ **Mandatory market**: CSRD/Fit for 55 regulations = forced purchases ✓ **Platform moat**: MCP-native architecture, not a point solution ✓ **Clear path to Series A**: €900k ARR milestone in 18 months ✓ **Downside protection**: Finland-based, EU regulation tailwind
