Lifetime Oy

DWS IQ 6 Investor Pitch Deck

The Carbon Balance Sheet for Europe's Industrial Economy

EU companies face €10k–50k annual fines for carbon non-compliance.
We make compliance automatic.

EXECUTIVE BRIEF

For the investor who reads nothing else — this page is enough to decide.

WHAT WE DO

Lifetime Oy builds **DWS IQ 6** — the carbon balance sheet for Europe's industrial economy. Double-entry bookkeeping for CO_2, so every tonne is tracked like every euro. We deliver AI-powered compliance and energy decisioning at sub-100ms latency for €8,500/month — 73–90% cheaper than legacy Building Management Systems.

WHY IT MATTERS

50,000+ EU companies face **mandatory CSRD compliance now**. Non-compliance means €10k–50k annual fines. Four EU regulations (CSRD, Fit for 55, EPBD, ETS) converge between 2025–2028, creating a **€150B forced-purchase market**. Companies must buy something or pay the government. We are the best something.

PROOF IT WORKS (March 2026, validated)

€7k MRR	0% Churn	15:1 LTV:CAC	6 Customers
Live & growing	9 months validated	Top-decile SaaS	100% retention

"DWS cut our CSRD compliance time from 60 hours to 8 hours per month — 87% reduction."
— Logistics Operator 1, Finland (anonymised; willing to speak with investors)

COMPETITIVE POSITION

Well-funded US competitors (including $11M+ raised) have **chosen not to enter the EU market**. The reason: EU compliance alone requires €2.8M–6.25M and 24–36 months before first customer. We absorbed this during bootstrap. That gap is our fortress — not a feature advantage, a structural barrier.

THE ASK

€650k SAFE @ €3.8M cap. This raise funds 12–15 months of runway, the Arctic 15 sales sprint (June 15–Aug 15, 2026), and our senior AI engineer hire (Q3 2026). **Milestone: €900k ARR by Q4 2026 → Series A ready at €15M+ valuation.**

Captain seat (€50k): projected 3.9× return at base-case €15M Series A.

THE FOUNDER

Risto Anton Päämi — 35 years enterprise software, industrial IT & cloud architecture. Bootstrapped DWS IQ 6 to €7k MRR with zero external capital. €495k consulting revenue (2023–2024) self-funded the platform. Built 18 agents and 32 products through an AI-native development system at <10% of traditional team cost.

Slide 0: The Hook — What We Are, Who We Serve, Why We Win

EU companies face €10k–50k annual fines for carbon non-compliance.
We make compliance automatic.
€7k MRR · 6 paying customers · 0% churn · 9 months validated

The Situation in One Paragraph

50,000+ EU companies are legally required to report carbon data or face fines. The legacy systems that existed for this cost €50k–200k per year, require 6-month implementations, and still produce non-compliant reports. Companies are locked in contracts they hate or facing audits they cannot pass. The regulatory deadlines are not approaching — **they are already here.**

What DWS IQ 6 Delivers

For Who	What They Get	What They Pay
Logistics & construction companies (50–500 employees)	CSRD-compliant reports in <8 hours/month vs. 60 hours manual; zero-penalty audit readiness	€6,500 setup + €1,999/year
Industrial sites with energy systems	Sub-100ms energy optimization decisions; 22–35% energy cost reduction; 8–22× ROI in 18 months	€8,500/month + €25,000 impl.

The Four Numbers That Matter

15:1 LTV:CAC	0% Churn	€3.50/mo Infra	€3M–6M Entry Cost
Top-decile SaaS. Industry benchmark: 3:1 min, 8:1 excellent	9 months, 6 customers. Industry: 5–10% annual	95%+ gross margins via Cloudflare + edge hybrid	What it costs a competitor to enter our market

THE ASK: €650k SAFE @ €3.8M cap → €900k ARR → Series A @ €15M+ (Q4 2026)
Fleet Admiral €200K (1 seat) | Captain €50K (9 seats) | Deputy Captain €5K (unlimited)

Slide 1: The Fortress Advantage — The 21-Moat Structure

We Built a 21-Moat Competitive Fortress

The One-Liner: Lifetime builds the carbon balance sheet — double-entry bookkeeping for CO_2, so every tonne is tracked like every euro.

Current Traction (Validated, March 2026)

- €7k MRR live revenue (6 paying customers — 100% retention, zero churn)
- 18 AI agents, 32 products, 5 cloud environments across 20 EU-regulated verticals
- Sales sprint: June 15 – August 15, 2026 (Arctic 15 launch anchor event)
- 21 competitive moats across 4 tiers (€3M–6M / 24–36 month entry barrier)
- €6.7B EU Funding eligible (EIB SESI, Horizon Europe, Defence Equity Facility — dual-use qualified)
- KYA-S Certified: Hardware-attested agent governance with D&O safe harbor proof (8–12% insurance premium reduction)
- Lifetime World Model (55B parameter target architecture) — domain RAG layer on Llama 3.1 70B via Groq LPU; sub-100ms latency in production

The 21-Moat Fortress Structure

TIER 1 — IMPOSSIBLE TO REPLICATE (24–36 months / €2.8M–6.25M)

- 1. EU/Nordic Operations > 2. Government Validation (4.2M citizens) > 3. NCC Reference (€55B construction leader) > 4. InvestEU Portal (INPO-20254383) > 5. Tech Stack (NVIDIA, Google, AWS, Groq)

TIER 2 — VERY HARD (12–24 months / €500k–1.5M)

- 6. NIS2 Art. 21 Expertise (114 req.) > 7. Edge Computing Deployed > 8. CIDM Patent > 9. Multi-Tenant Architecture > 10. B2B2G Model (4× switching costs)

TIER 3 — MODERATE (6–12 months / €300k–600k)

- 11. Nordic Languages > 12. Construction Domain > 13. Dual Product Strategy > 14. Offline Capability > 15. Regulatory-First DNA

TIER 4 — OPERATIONAL (3–6 months / €150k–300k)

- 16. €3.50/mo Infrastructure > 17. Sub-100ms Latency > 18. Data Benchmarking > 19. €135k Credits > 20. Working-Class Positioning > 21. AI-Native Development System (NEW v4.1)

Competitive Moat: Well-funded US competitors with €10M+ raises have declined to enter the EU regulated market — EU compliance cost alone (Tier 1) requires €2.8M–6.25M before first customer.

Slide 2: The Problem — Dual Pain Points Create Forced Purchases

Pain Point 1: Compliance Burden (Validated)

Customer	Pain Point	Before DWS IQ 6	After DWS IQ 6
Logistics Operator 1	CSRD reporting	60 hours/month	**8 hours/month (87% reduction)**
Logistics Operator 3	Audit readiness	6 months manual	**4 weeks automated**
Logistics Operator 2	ETS compliance	€10k–50k penalties risk	**€0 penalties (compliant)**

> *"DWS cut our CSRD compliance time from 60 hours to 8 hours per month. We went from dreading the audit to having the report ready before the deadline."*
> **— Logistics Operator 1, Finland** (anonymised per NDA; reference call available to qualified investors)

Data Fragmentation Challenge: Invoices, fuel receipts, subcontractor reports across 5–10 systems → 35–45% public tender rejection rate → 40–80 hours/month manual Excel work per site.

Pain Point 2: Technical Performance Gap

Metric	Legacy BMS	DWS IQ 6	Advantage
Decision Latency	2–5 minutes	<100ms	**120–300× faster**
Architecture	Cloud-only / on-premise	Hybrid edge-cloud	EU data sovereignty
Model Capacity	Rules-based / <10B params	70B (Groq) + domain RAG	Complex EU reasoning
Annual Cost	€50k–200k + €150k impl.	€102k (€8,500/mo ×12)	**73–90% cheaper**

Slide 2.5: Why Now — Four Regulations Converging in 36 Months

The window is not opening — it already opened.

Companies must buy something or face fines. CSRD first reporting obligations were **due in 2025**. Non-compliance has already resulted in penalties across the EU. This is not a 'coming regulatory wave' — the wave hit. Companies calling us now are already in breach.

The Four-Regulation Convergence (2025–2028)

Year	Regulation	Companies Affected	Market Impact
2025–2026	CSRD	**50,000+ EU enterprises**	€2B compliance software
2025–2028	Fit for 55	Construction, logistics	€5B optimization platforms
2027–2030	EPBD	All major renovations	€8B building passports
2027–2028	ETS expansion	Healthcare, manufacturing, agriculture	€13B carbon management

Three Timing Accelerants — Why the Window Is Now

ACCELERANT 1: Finland Implements 6–12 Months Early

- Finland implemented CSRD in March 2025 vs. June 2025 EU average — we are live in the market BEFORE competitors even start compliance work
- First-mover customers in Finland become reference accounts for Sweden/Norway expansion (Q3 2026)
- Investor impact: forced buyers already exist in our market; we are not waiting for regulation to kick in

ACCELERANT 2: CSRD Deadlines Are Active, Not Approaching

- Large companies (>500 employees): already reporting from FY2024 (deadline March 2025)
- Mid-market (50–500 employees): FY2025 reporting due June 2026 — our primary sales sprint target
- These companies MUST be compliant for the report they are writing RIGHT NOW

ACCELERANT 3: Arctic 15 Launch Creates Public Sales Catalyst

- June 15, 2026: V1 public launch at Arctic 15 (Finland's premier tech conference)
- Sales sprint June 15 – August 15: 25–30 qualified meetings target with pre-positioned pipeline
- Media coverage during the Arctic 15 window creates inbound at zero marginal cost

Key Insight: Companies must buy **something** or face fines. DWS IQ 6 delivers best compliance automation AND operational efficiency (22–35% energy cost reduction, €1.2–2.8M annual efficiency gains per site). The regulatory timeline is our sales calendar.

Slide 3: The Solution — What the Customer Gets

From the customer's perspective: A compliance manager opens DWS IQ 6 at 8am. By 8:03am, the CSRD report is ready, verified, and audit-ready. No Excel. No consultant. No fines. For industrial sites: energy optimization decisions every 100ms, 22–35% energy cost reduction visible in the first month.

DWS IQ 6: Brain–Memory–Body–Hands Framework

THE BRAIN: Groq LPU Multi-Agent Orchestration

- 1,250 tokens/sec (Llama 3.1 70B) · Sub-100ms for complex multi-objective optimization
- RLVR learning · Dynamic η adaptation · 120–300× faster than legacy BMS

THE MEMORY: Lifetime World Model (Domain Fine-Tuning Layer)

- Production: Llama 3.1 70B via Groq + RAG with EU regulatory corpus (24h update cycle)
- Roadmap: 55B parameter edge-optimized model (architecture finalized; training contingent on EIB SESI milestone)
- Extended vocabulary for CSRD, EPBD, ETS, Fit for 55. Regulatory updates within 24 hours.

THE BODY: NVIDIA Jetson Orin NX Edge Computing

- 7–15W (solar-ready) · 100 TOPS · Sub-100ms local (no cloud round-trip) · 72h offline capability
- EU data sovereignty: customer data never leaves edge device (GDPR Art. 4) · AWS IoT Greengrass

THE HANDS: MCP Agent Layer

- Firehorse Report (compliance) · Firehorse Flow (automation) · Energy Optimization Agent · Predictive Maintenance
- Open Anthropic MCP standard — no vendor lock-in · 3rd-party extensible · Agent marketplace (70/30 dev/platform split)

Two-Tier Product Strategy

	Tier 1: Climate Reporting Starter	Tier 2: Industrial Decisioning Platform
Price	€6,500 setup + €1,999/year	€8,500/month + €25,000 implementation
Status	**VALIDATED** (€7k MRR, 6 customers)	LAUNCHING — sales sprint June 15–Aug 15
CAC	€6,000	€18,500 (projected)
LTV	€90,000	€161,200
LTV:CAC	**15:1**	**8.7:1**
Gross Margin	75%+	70%+
Churn	0% (9 months validated)	<8% target

Slide 4: The 21-Moat Fortress — Why Competitors Abandon Entry

EU Political Validation (February 2026): At the Alden Biesen informal retreat, EU leaders declared the Single Market — 450 million consumers — as "Europe's true superpower." EU compliance is not a cost center but an access key to the world's most valuable regulated market.

Tier 1 — Impossible to Replicate (€2.8M–6.25M / 24–36 months)

#	Moat	Barrier	Fortress Value
1	EU/Nordic Operations + Single Market Access (450M consumers)	€2.8M–6.25M for GDPR, NIS2, AI Act compliance	Absorbed during bootstrap; EU compliance = privileged market access
2	Government Validation (healthcare agency, 4.2M citizens)	24-month procurement cycle	4× higher switching costs; reference selling eliminates cold outreach
3	NCC Reference (€55B construction leader)	3–5 year Nordic trust-building cycle	T2H Construction (NCC subsidiary) pilots in discussion
4	InvestEU Portal Acknowledgment (INPO-20254383)	18–24 months EU institutional validation	Opens €6.7B funding stack; EU autonomy push favors EU-native platforms
5	Tech Stack Partnerships (NVIDIA, Google, AWS, Groq)	6–12 month Groq LPU lead times	Hardware allocation secured during bootstrap phase

Tier 2 — Very Hard (€500k–1.5M / 12–24 months)

#	Moat	Fortress Value
6	NIS2 Article 21 Expertise (114 requirements)	Built during development; competitors must retrofit
7	Edge Computing Deployed (NVIDIA Jetson live)	Sub-100ms at 7–15W; solar-ready
8	CIDM Patent (Climate-Intelligent Decision Matrix, Dec 2024)	IP protection for core decisioning algorithms
9	Multi-Tenant Architecture (production-ready)	Horizontal scaling without marginal infrastructure costs
10	B2B2G Model (Business→Business→Government)	4× switching costs vs B2B; healthcare validates model

Tier 3 — Moderate (€300k–600k / 6–12 months)

- 11. Nordic Languages (Finnish/Swedish native fluency) · 12. Construction Domain (10+ years) · 13. Dual Product Strategy · 14. Offline Capability (72h) · 15. Regulatory-First DNA

Tier 4 — Operational (€150k–300k / 3–6 months)

- 16. €3.50/mo Infrastructure · 17. Sub-100ms Latency · 18. Data Benchmarking (network effects) · 19. €135k Non-Dilutive Credits · 20. Working-Class Positioning · 21. AI-Native Development System (NEW v4.1)

Total Fortress Barrier: €3.09M–8.35M + 24–36 Months

97% of potential competitors never launch a competing product. 3% who succeed enter 36+ months behind us, facing an established customer base with high switching costs.

Slide 5: Market — €150B EU Compliance + Strategic Funding Multipliers

TAM / SAM / SOM — Bottoms-Up

Geography	Companies	Annual TAM	10-Year TAM
Finland (2025–2026)	150,000	€375M	€2.6B
Sweden	450,000	€1.125B	—
Norway	200,000	€500M	—
Total Nordic	**830,500+**	**€2.65B**	**€24.5B**
EU (2027+)	500,000+	€3.3B–7B	€33B–70B

Serviceable Obtainable Market (3-Year Target): Finland SOM = 150,000 SMEs × 5% addressable × €1,999/year = €15M (Tier 1) + 500 industrial sites × €102k/year = €51M (Tier 2). **DWS capture target: 0.5–2% of Nordic SOM = €400k–2.4M ARR**. This underpins the Series A valuation of €15M+.

EU Funding Stack (Cascading Qualification)

Phase	Program	Amount	Probability	Expected Value
1	EIB SESI (Q2 2026 application)	€880k–1.52M	60%	€528k–912k
2	Horizon Europe Clean Industrial Deal	€2–4M grant	22%	€550k
3	Defence Equity Facility (Q3 2026–Q1 2027)	€3–8M equity	40%	€2M
Total	**€6.7B eligible programs**	—	—	**€1.58M–3.46M**

Valuation Milestones (Funding-Gated)

Milestone	Pre-Money Valuation	Rationale
Current (€7k MRR)	€3.8M	Fortress + Arctic 15 + KYA-S certification
Post-EIB SESI (Q3–Q4 2026)	€8–12M	EU institutional validation + €880k–1.52M non-dilutive
Post-Horizon Europe (2027)	€12–18M	€2.5M grant + multi-country expansion
Series A Ready (Q4 2026)	**€15M+**	**€900k ARR + 21-moat fortress + EU funding track record**

Slide 5.5: Go-To-Market Strategy — How We Get to €900k ARR

The question every investor asks: *"How do you get to €900k ARR? Walk me through it day by day." — This slide answers that.*

Ideal Customer Profile (ICP)

Dimension	Detail
Company size	50–500 employees
Industries	Logistics, construction, healthcare — Finland → Sweden → Norway
Pain trigger	CSRD deadline + current manual Excel-based compliance reporting
Decision maker	CFO / Head of Sustainability / Operations Director
Deal velocity	Tier 1: 2–4 weeks sales cycle · Tier 2: 6–12 weeks with pilot
Expansion signal	Tier 1 customers upgrade to Tier 2 after first compliant report delivered

Sales Motion — Four Channels

CHANNEL 1: INBOUND — Arctic 15 + Content Marketing

- June 15, 2026: V1 public launch at Arctic 15 (Finland's premier tech conference, 3,000+ attendees)
- Target: 25–30 qualified demo requests from conference media coverage
- Sales sprint June 15 – August 15: convert pipeline to signed contracts before September
- Estimated CAC: €2,000–4,000 (vs. current €6,000 outbound CAC)

CHANNEL 2: OUTBOUND — Reference-Led Warm Introductions

- Government healthcare agency (4.2M citizens) → reference calls for public-sector prospects
- NCC reference (€55B construction leader) → warm introductions to T2H Construction pilot
- Each paying customer actively introduces us to 2–3 peers (validated across 6 current customers)

CHANNEL 3: B2B2G — Enterprise Intermediary

- Large enterprise (NCC, logistics consortiums) signs DWS IQ 6 → deploys to their supplier network
- B2B2G creates 4× switching costs vs. direct B2B: government validation embedded in contract
- One NCC deployment covers 50–200 subcontractor sites = €5–20M ARR at scale

CHANNEL 4: PARTNER & ACCELERATOR NETWORK

- Peachscore Cohort 25 → investor warm introductions + co-selling with alumni network
- NVIDIA Connect, AWS Consulting Partner, Microsoft Founders Hub — co-marketing programs
- EU accelerators (EIB, Horizon Europe application process) create qualified enterprise leads

Pipeline to €900k ARR — 18-Month Bridge

Quarter	Target MRR	Key Milestone	Customers	Channel Driver
Q2 2026 (now)	€14k MRR	Convert 3 construction pilots	9 customers	Outbound / NCC ref.
Q3 2026	€40k MRR	Arctic 15 launch + 15 new deals	20–22 customers	Inbound / conference
Q4 2026	€60k MRR	Break-even + EIB SESI	25–28 customers	B2B2G

Quarter	Target MRR	Key Milestone	Customers	Channel Driver
		decision		conversions
Q1 2027	**€75k MRR**	**Series A ready**	**30+ customers**	**Nordic expansion**

Why This Works: We are not selling a new category — we are the cheapest, fastest path to avoid a fine that is already happening. Every sales conversation starts with the customer's pain, not our product. The conversion rate is high because the alternative to buying DWS IQ 6 is paying the government.

Slide 6: Technical Architecture — Sub-100ms at €3.50/Month Infrastructure Cost

Four-Layer Architecture

1. THE BRAIN: Groq LPU Multi-Agent Orchestration

- 1,250 tokens/sec (Llama 3.1 70B) · Sub-100ms decision latency · RLVR learning architecture
- 120–300× faster than legacy BMS · Real-time energy arbitrage every 100ms

2. THE MEMORY: Lifetime World Model

- Current Production: Llama 3.1 70B via Groq + RAG with custom EU regulatory corpus.
- Target Architecture (in development): 55B parameter decoder-only transformer sized for edge inference on NVIDIA Jetson (100 TOPS). Full training contingent on EIB SESI funding milestone.

3. THE BODY: NVIDIA Jetson Orin NX

- 7–15W power (solar-ready) · 100 TOPS · 72h offline autonomous operation
- EU data sovereignty: customer data never leaves edge device (GDPR Art. 4)

4. THE HANDS: MCP Agent Layer

- Open Anthropic MCP standard — no vendor lock-in · Agent marketplace (70/30 developer/platform split)
- 3rd-party integration: customers plug proprietary agents via MCP hub

Competitive Performance

Capability	Siemens Desigo	Honeywell Forge	Schneider EcoStruxure	DWS IQ 6
Decision Latency	2–5 min	1–3 min	45–90 sec	**<100ms**
Edge Deployment	✗	✗	Partial	**✓ Full**
EU Data Residency	Partial	✗ US-centric	Partial	**✓ Native**
Model Capacity	Rules-based	<1B params	10B params	**70B + domain RAG**
Offline Capability	✗	✗	Limited	**✓ 72 hours**
MCP Integration	✗	✗	✗	**✓ Native**

Slide 7: Business Model & Validated Unit Economics

KYA Standard — Know Your Agent: Hardware-attested agent identity, capability gating, court-defensible audit trails. EU AI Act fines up to €35M or 7% global revenue → KYA-S certification provides D&O safe harbor + estimated 8–12% insurance premium reduction.

Alpha-Share Revenue Model: 12% (first €1M) / 8% (€1M–€10M) / 5% (above €10M) of verified efficiency gains. Projected 8–22× ROI within 18 months in heavy-industry deployments.

Validated Unit Economics — Tier 1 (9 Months Data)

Metric	Value	Industry Benchmark	Performance
CAC	€6,000	€8,000–12,000	**25–50% better**
LTV	€90,000	€60,000–80,000	**13–50% better**
LTV:CAC	**15:1**	3:1 min / 8:1 excellent	**Top decile**
Gross Margin	75%+	70–75% mature SaaS	**Industry-leading**
Payback Period	8 months	12–18 months	**40–55% faster**
Churn Rate	**0%**	5–10% annual	**Perfect retention**

Break-Even Analysis

MRR Level	Gross Profit (70%)	Fixed Costs	Net Cash Flow	Status
€7k (current)	€4,900	€23,000	-€18,100/mo	Burning €217k/year
€30k (Q2 2026)	€21,000	€23,000	-€2,000/mo	Near break-even
€35k	**€24,800**	**€23,000**	**+€1,500/mo**	**BREAK-EVEN**
€60k (Q4 2026)	€42,000	€23,000	+€19,000/mo	**Profitable**

Slide 7.5: Revenue Architecture — The DWS Liquidity Engine

DWS IQ 6 is not a pure SaaS company. It operates a Liquidity Engine — two parallel revenue streams that reach €900k ARR without institutional capital as a prerequisite. The engine is designed to print money, not dilute equity.

Two-Stream Revenue Architecture

Stream	Mechanism	Q4 2026 Target	Status
Product Sales — Direct	32 products, B2B direct, dws10.com	**€300k ARR**	Active — €7k MRR
Product Sales — Partners	Tier 1-3 resellers + OEM channel	**€200k ARR**	Q3 2026 activation
Engine — Fleet Admiral	1 × €250k seat — platform-level rights	**€250k**	Q3 2026 target
Engine — Industry Captains	9 × €50k SAFE — own a vertical	**€150k (3 seats)**	1 sold, 8 open
Engine — Deputy Seats	€25k — supporting role in vertical	**€75k**	Opens Q3 2026
Advisory & Training	Hourly / daily / retainer consulting	**€125k**	Active
TOTAL	**Products + Engine**	**€900k ARR**	**Q4 2026**

The Three-Tier Seat Architecture

TIER 1 — Fleet Admiral | €250,000 | 1 seat

- Full platform distribution + co-brand rights across all 21 EU industry verticals
- Access to DWS Brain, World Model, and Situation Room — all sectors
- Revenue share on all Captain and Deputy seats sold downstream
- Monthly CEO strategy session | Co-author on platform roadmap
- Buyer: Nordic/EU CXO, family office, or strategic operator — €2.68B Nordic TAM

TIER 2 — Industry Captain | €50,000 SAFE | 9 seats (8 open as at Q2 2026)

- SAFE note: €3.8M valuation cap · 18% discount on next priced round · First tranche
- Own one EU industry vertical permanently — shape the product roadmap for that sector
- Access to DWS Brain, World Model, Situation Room for assigned vertical
- Annual CEO 1:1 strategy session | Named on founding crew page (dws10.com/captain)
- Verticals: Construction, Logistics, Manufacturing, Energy, Healthcare, Financial Services, Retail, Public Sector, Technology

TIER 3 — Deputy Captain | €25,000 | Open seats (2–4 per vertical)

- Supporting role within an Industry Captain's vertical — distribution + intelligence
- Access to DWS Brain + Situation Room for assigned vertical
- Customer introductions and sector event representation for the Captain
- Managed at the Captain's discretion; 2–4 deputies per vertical maximum

ARR Bridge — Products + Engine = €900k Q4 2026

Start: €84k run-rate (€7k MRR × 12, current pilot customers)

+ €216k Direct product growth — Arctic 15 GTM (300 attendees → 21 signed customers Q3–Q4)
+ €200k Partner channel — 5 Tier 1-3 partners onboarded Q3 2026
+ €250k Fleet Admiral seat (1 seat, Q3 2026 close target)
+ €150k 3 × Industry Captain SAFE seats (8 open, Q3–Q4 closes)

= €900k ARR run-rate · Q4 2026 target

Capital efficiency: Fleet Admiral + 3 Captain seats in Q3 = €400k non-dilutive cash received. A €500k institutional raise becomes optional, not existential — this is why the Liquidity Engine matters.

Slide 8: Team & Finland Strategic Advantage

Founder & CEO: Risto Anton Päämi

35 Years Enterprise Software, Industrial IT & Cloud Architecture

The Origin Story: In 2022, Risto was advising a €500M Nordic logistics company on their CSRD compliance. Their team of 12 was spending 60 hours per month on carbon reporting using Excel spreadsheets and a €150k BMS system that couldn't produce a compliant report. He built the first DWS prototype in 6 weeks. That customer is still paying today, nine months later, and has never asked about competitors.

- Built agentic AI systems for Fortune 500 clients (confidential NDA)
- Deep expertise in MCP, Claude, autonomous agent orchestration
- Bootstrapped DWS IQ 6 to €7k MRR with zero external capital
- €495k consulting revenue (2023–2024) self-funded platform development
- 100% customer retention (6 paying customers, 9 months)
- 21-moat fortress built with <€500k vs. competitors spending €3–8M
- AI-native development: 18 agents, 32 products at <10% of traditional team cost

The Production Method: Risto orchestrates 10 AI models (Claude, Gemini, Groq, LlamaStack, and 6 specialized agents) through a systematic, KYA-audited, GitHub-traceable process. Every commit is traceable. Every product has a lineage. This methodology — not headcount — is how 18 agents and 32 products were built with one founder.

Team & Advisors

- Lucille Santiago — Logistics & Office
- Hire Plan: First €50K funds a senior AI engineer (Q3 2026) who multiplies the AI orchestration system — not replaces the methodology. One engineer within Risto's process = output of a traditional 5–10 person team.
- Hannu-Pekka Robertsson — CEO, Robertsson Oy (ESG & Business Consulting, PhD, keynote speaker)
- Dr. Jarne Markeva — Metropolia University (Academic Advisor)
- Dr. Erkki Rissanen — Metropolia University (Academic Advisor)
- Accelerator: Peachscore Cohort 25
- Partnerships: NVIDIA Connect, Microsoft Founders Hub (L1–L4), Google, AWS Consulting Partner, IBM Business Partner, Acer Finland, Konfitech

The Finland Advantage: 6–12 Month Regulatory Head Start

Advantage	Detail	Investor Impact
Regulatory First-Mover	Finland implements EU directives 6–12 months faster (CSRD: March vs. June 2025)	Forced buyers 6–12 months before competition enters
AAA Credit Rating	S&P, Moody's, Fitch — Finnish Company Act enforced	Investor protection + transparent governance
Nordic Exit Multiples	Basware €477M (8×), Aiven €3B (12×), Wolt €7B (35×)	8–15× revenue M&A premium vs. EU peers
NATO / Defence	Finland NATO member 2023; €500M dual-use allocation	3–10× funding multiplier via defence programs
GDPR Leadership	Most rigorous DPA in EU; NIS2 guidelines 18 months early	Compliance by design; competitors must retrofit

Slide 8.5: The Production Method — Paradigm Shift as Moat

Investor question: *You have 18 agents and 32 products. Who built all this?*
Answer: Risto Päämi + 10 AI models + systematic GitHub-audited process.

The 9.x → 13.2 Development Timeline

Era	Version	Method	Result
Pre-2025	9.x	Human-only development	Good quality products
2025	9.1–9.4	AI-assisted (same processes)	Better quality, same velocity
2025+	**13.2**	**AI-native (new paradigm)**	**10× velocity, fraction of cost**

Paradigm cutoff: December 31, 2025. The next version in competition is not 9.5 — it is 13.2. Competitors spending €500K on 5 engineers produce version 9.5. Lifetime Oy spending €50K with 1 founder + AI orchestration produces 13.2. This is not theory — it is the auditable history of this repository.

The Cost Structure Moat

Metric	Traditional Dev Team	DWS AI-Native Dev	Advantage
Agents built	<5 (team of 5)	18 (1 founder + 10 models)	**3.6×**
Products shipped	8–12	32	**3–4×**
Cost to replicate	€500K+ engineering	€50K founder + compute	**10× lower**
Development auditability	Git + code review	Git + KYA session logs	**Full lineage**

GitHub audit trail: Every commit, every agent, every product version — KYA-audited, public proof of systematic AI-orchestrated development.

github.com/blogtheristo/dws6

"18 agents, 32 products, 6 paying customers, €7K MRR — built by one founder orchestrating 10 AI models with a systematic, KYA-audited, GitHub-traceable process. This is not theory. This is evidence."

Slide 9: Fundraise Structure & Use of Funds

We are raising €650k at a €3.8M valuation cap via SAFE.

This raise funds 12–15 months of runway, the Arctic 15 sales sprint, and the senior AI engineer hire. At €900k ARR (Q4 2026), the company is Series A ready at a €15M+ pre-money valuation.

Seat Tiers

Tier	Investment	Seats	Benefits
Fleet Admiral	**€200,000**	**1**	**Board observer rights, annual 1:1 strategy, first right of refusal on follow-on**
Captain	€50,000	9	Named captain covering EU-regulated industry cluster, quarterly briefings, Situation Room
Deputy Captain	€5,000	Unlimited	Quarterly briefings, upgrade path to Captain

Round math: €200K (Fleet Admiral) + 9 × €50K (Captain Seats) = €650K total

Valuation Justification

Component	Value	Rationale
Base (MRR Multiple)	€2.9M	€7k MRR × 42× (industry standard)
Fortress Premium	+€600k	21-moat barrier = €3–6M competitor entry cost
Launch Optionality	+€300k	Arctic 15 launch June 15, 2026 + sales sprint
Total	**€3.8M**	**Defensibility + growth catalysts**

Captain Seat Returns Example (€50K)

Series A Outcome	Ownership	Value	Multiple	Probability
€10M (conservative)	1.3%	€130k	2.6×	30%
€15M (base case)	**1.3%**	**€195k**	**3.9×**	**50%**
€20M (optimistic)	1.3%	€260k	5.2×	20%

Use of Funds

Category	Allocation	Amount	Key Deliverables
Product Development	40%	€260,000	MCP agent framework, construction vertical, edge optimization, SAP/ERP integration
Sales & Marketing	35%	€227,500	Sales team, pilot conversions, Arctic 15 launch, sales sprint execution
Operations	15%	€97,500	Senior AI engineer hire (Q3 2026), infrastructure, legal/compliance
Runway Buffer	10%	€65,000	Emergency reserve, bridge financing

12–18 Month Milestones to Series A

Milestone	Target	Key Metric
Convert construction pilots	Q1–Q2 2026	€14k MRR
Arctic 15 launch + sales sprint	Q2–Q3 2026	€40k MRR + pipeline
Expand to Sweden/Norway	Q3 2026	€60k MRR, break-even visibility
Series A readiness	**Q4 2026**	**€60k+ MRR / €900k+ ARR / 25–30 customers**

Slide 10: Closing & Call to Action

The 5 Fortress Pillars — Why Invest Now

PILLAR 1: PROVEN TRACTION (Execution Risk Eliminated)

- €7k MRR live · 100% retention over 9 months · Government healthcare customer (4.2M citizens) · 15:1 LTV:CAC (top decile)

PILLAR 2: MANDATORY MARKET (Forced Purchases)

- €150B EU Fit for 55 compliance costs · 50,000+ companies under CSRD mandate now · Finland implements 6–12 months faster · €10k–50k annual penalties for non-compliance

PILLAR 3: TECHNICAL MOAT (120–300× Performance)

- Sub-100ms vs. 2–5 minute legacy BMS · 70B + domain RAG (edge-optimized roadmap) · 24–36 month technical lead · Legacy systems need €50–100M R&D to compete

PILLAR 4: STRATEGIC FUNDING LEVERAGE (3–10× Multiplier)

- Dual-use qualification · 3:1 EIB leverage (€220k → €660k–1.14M) · €1–2.5M non-dilutive expected value

PILLAR 5: CLEAR PATH TO SERIES A (€15M+ Valuation)

- €900k ARR in 18 months · 25–30 customers, 3 verticals · Finland + Sweden + Norway · 21-moat fortress creates pricing power

Let's build the operating system for Europe's intelligent industries together.

The 21-moat fortress is not just defensible — it's a strategic asset that creates pricing power at every funding stage.

4.9× return at €15M Series A · €1–2.5M EU non-dilutive funding multiplier · Nordic exit optionality (8–15× revenue)

The fortress advantage = your downside protection.

Appendix: Key Metrics & Data Room

Key Metrics Tracker

Metric	Current	Q1 2026 Target	Q4 2026 Target	Benchmark
MRR	€7,000	€14,000	€60,000	—
Paying Customers	6	9	25-30	--
Churn Rate	0%	<5%	<5%	5-10% annual
CAC (Tier 1)	EUR6,000	EUR6,000	EUR6,000	EUR8k-12k
LTV (Tier 1)	EUR90,000	EUR90,000	EUR90,000	EUR60k-80k
LTV:CAC (Tier 1)	15:1	15:1	15:1	3:1 min / 8:1 excellent
Gross Margin	75%	72%	70%	70-75% mature SaaS
Monthly Burn	-EUR18,100	-EUR13,200	-EUR2,000	--

Due Diligence Materials Available

- Cap Table & SAFE note register (available under NDA)
- Audited pilot revenue data (EUR7k MRR, 6 customers, 9 months)
- Customer contracts (3 available for review under NDA)
- Technical architecture documentation (MCP, KYA-S, CIDM)
- EU AI Act compliance roadmap (Article 9, 12, 17 implementation plan)
- NIS2 Article 21 implementation audit trail
- CIDM Patent application (/legal/patent/) -- Climate-Intelligent Decision Matrix
- InvestEU Portal Acknowledgment (INPO-20254383)
- Gap Analysis vs. YC/Sequoia best practices (DWS-IQ6-GAP-2026-001, v4.2 applied)
- v4.3: Revenue Architecture -- DWS Liquidity Engine (Slide 7.5 added: Fleet Admiral + Captain seats + ARR bridge)
