LIFETIME OY · ESPOO, FINLAND · EIC ACCELERATOR

AEGIS

Sovereign AI agents that act for regulated Europe.

DWS IQ on the customer's own NVIDIA DGX — data and model weights never leave the building. €2.5M grant-only · TRL 6→8.

NVIDIA Connect ISV Partner | IBM Business Partner | Amazon (AWS) Consulting Partner

THE PROBLEM

Who is in control?

- AI agents are starting to **act and pay** for enterprises.
- Europe regulates the **humans** and the **models** — nothing regulates the **agent**.
- Every answer today (x402, Google AP2, Stripe) is **US-custodial** and binds the human, not the agent.
- From **Aug 2027**, the EU AI Act makes getting this wrong an enforceable violation.

THE SOLUTION · LIVE TODAY

DWS IQ Aegis

- **50 production agents**, 25 regulated industries.
- Runs on the customer's **own NVIDIA DGX** — sovereignty guaranteed by **physics, not policy**.
- KYA engine: **identity · live trust score · Leash Snap revocation · Article-12 audit**.

PAYING CUSTOMERS	MRR	RETENTION

THE INNOVATION · WHAT THE EIC FUNDS

From gating actions → acting under mandate

- A signed, revocable **mandate credential** + a **selective-disclosure proof** (within mandate, without revealing it).
- **Tier-aware Sovereignty Profile** (cloud · on-prem DGX · hybrid).
- **Signed Sovereignty Attestation** → EU AI Act compliance **machine-verifiable** across cloud, edge, air-gapped.
- Deep tech (zero-knowledge cryptography). **TRL 6→8.** The lead patent claim.

WHY NOW

Regulation creates the demand

- EU AI Act Articles 12/14/72 enforce for high-risk systems **Aug 2027**.
- EU sovereign rails arriving: **EUDI Wallet** (law 12/2026), **ECB Digital Euro** pilot H2 2027.
- Agents transacting on EU rails need an **EU-sovereign trust layer**. US card-rail answers can't plug in.

MARKET

Regulated EU industry — and beyond

- Energy, manufacturing, construction, logistics, finance, healthcare — **25 verticals**.
- Carbon/compliance software: **~$24B (2025) → ~$191B (2035)**, 22.9% CAGR.
- Cross-domain pull: **EDA** — NVIDIA & Si2 DAC 2026 panel *"Agentic AI: Who's in Control?"*

BUSINESS MODEL · TRACTION

A model that already prices

- Aegis **€59,990** + subscriptions (€499–€2,999/mo) + outcome SKUs + grant-enabled **action tier**.
- **€7k MRR · 100% retention · roadmap to €60k MRR.**
- Every conformant third-party agent becomes a **channel**, not a competitor.

COMPETITION · THE SOVEREIGNTY WEDGE

Only one platform ticks all four

- **EU-sovereign × agent-native × compliance-native × in-production** = DWS IQ Aegis.
- x402 / AP2 / Stripe: US, card/crypto rails.
  Shufti/Onfido: verify humans, not agents.
- US players **can't** run inference in your building (CLOUD Act) or settle on EU rails. Aegis can.

TEAM

Founder-led · partner-delivered · agent-multiplied

- **Risto Anton Päärni** — Founder & CEO; architect of DWS IQ + KYA; NVIDIA/IBM/AWS partner; LUT doctoral candidate.
- **Cubet Techno Labs** — CEO John Lovegin: standing bench ~20 engineers, no key-person risk, NDA in force.
- Academic anchoring: **LUT** (quantum-safe/PhD) · **KTH TECoSA** (safety assurance) · **Metropolia** (engineering talent, 5/5 master's). **€650K SAFE** in progress.

THE ASK

€2.5M grant-only · 24 months · TRL 6→8

- **M6** spec v1.0 + Sovereignty Profile · **M12** Signed Attestation in production
- **M18** cross-border pilots (FI + SE) · **M24** certification path + €60k+ MRR

Fund the European answer for agents that transact — before the default is set elsewhere.
